Computer Performance

Index to Volume 4: 1983

Author

Abu el Ata, N Performance-analysis-aided decision making in a computer service company 141

Balbo, G and Bruell, S C Calculation of the moments of the waiting time distribution of FCFS stations in product form queueing networks 106

Bernardi, M and Scaramuzza, R PAST – time series analysis in workload forecasting 89

Bonnes, A Instruction execution time measurements in MVS systems 167

Brice, R Benchmarking your benchmarks: a user's perspective 73

Bytheway, A Structured development methodologies as a foundation for performance analysis 215

Carlis, J V and March, S T Computer aided physical database design methodology 198

Cook, J Resource management through effective accounting 61

Fairchild, W R Fast DASD: a tool for measuring and improving DASD performance 47

Guerich, W and Mertens, B Comparison of internal and external interactive response times 13

Hughes, H D Procedure for reducing the feature set of workload data 6

Jaragh, M H and Habib, M K R Evaluation of a dataflow model 242

Knight, A Capacity planning – an historical perspective 176

Knight, A Measuring printer capacity and utilization in an MVS/JES2 environment 19

Lee, B K Workload characterization of IMS 43

Paans, R MVS TSO network workload characterization and modelling 229

Paans, R and van der Hammen, T Development of a tracer for MVS problem program software 35

Reddi, A V Terminal buffer analysis in a distributed processing system 98

Stauffer, G Data centre management using SAS, SAS/Graph, MICS and SPF 80

Terplan, K Communications systems performance management 29

Thomasian, A and Bay, P Analysis techniques for queueing network models of multicomputer systems with shared resources 151

Thulin, K Technical and behavioural issues in centralized capacity planning for mixed vendor DDP systems 223

Tsuchiya, M Performance measurement of a database machine 238

Vafiadis, A and Lazos, C Indirect estimation of response variables using the sequential stopping rule 111

Zika, J Availability of data communications networks and network-based computer systems 134

Title

Analysis techniques for queueing network models of multicomputer systems with shared resources **Thomasian, A and Bay P** 151
Availability of data communications networks and network-based computer systems **Zika, J** 134
Benchmarking your benchmarks: a user's perspective **Brice, R** 73
Calculation of the moments of the waiting time distribution of FCFS stations in product form queueing networks **Balbo, G and Bruell, S C** 106
Capacity planning – an historical perspective **Knight, A** 176
Communcations systems performance management **Terplan, K** 29
Comparison of internal and external interactive response times **Guerich, W and Mertens, B** 13
Computer aided physical database design methodology **Carlis, J V and March, S T** 198
Data centre management using SAS, SAS/Graph, MICS and SPF **Stauffer, G** 80
Development of a tracer for MVS problem program software **Paans, R and van der Hammen, T** 35
Evaluation of a dataflow model **Jaragh, M H and Habib, M K R** 242
Fast DASD: a tool for measuring and improving DASD performance **Fairchild, W R** 47
Indirect estimation of response variables using the sequential stopping rule **Vafiadis, A and Lazos, C** 111
Instruction execution time measurements in MVS systems **Bonnes, A** 167
Measuring printer capacity and utilization in an MVS/JES2 environment **Knight, A** 19
MVS TSO network workload characterization and modelling **Paans, R** 229
PAST – time series analysis in workload forecasting **Bernardi, M and Scaramuzza, R** 89
Performance-analysis-aided decision making in a computer service company **Abu el Ata, N** 141
Performance measurement of a database machine **Tsuchiya, M** 238
Procedure for reducing the feature set of workload data **Hughes, H D** 6
Resource management through effective accounting **Cook, J** 61
Structured development methodologies as a foundation for performance analysis **Bytheway, A** 215
Technical and behavioural issues in centralized capacity planning for mixed vendor DDP systems **Thulin, K** 223
Terminal buffer analysis in a distributed processing system **Reddi, A V** 98
Workload characterization of IMS **Lee, B K** 43
